

Cybermatic

Your 'cybercrime' solution needs to encompass all aspects of your business: people, processes and systems

Cybermatic

Cybermatic is a best of breed, non-invasive solution for your information and data protection needs. Your 'cybercrime' solution needs to encompass all aspects of your business: people, processes and systems

Cybermatic protects each link in the chain to offer a complete and integral solution. Our holistic approach covers the complete information security spectrum, therefore significantly reducing the risk of unidentified gaps. Fewer gaps mean fewer cyber criminals. Cybermatic concentrates your defences more effectively

Advisory Expertise

Your business's data is a valuable asset – and you are responsible for protecting it. GDPR (Global Data Protection Regulation) is being implemented across Europe and is global in its effect

Protect yourself and protect your clients

Your business is responsible for the data it collects, holds and manages on behalf of its clients. Put yourself in the driving seat and manage the regulatory sea change

Risk associated with systems integrity is growing

The integrity of your internal systems is at risk every day, and that risk is growing. A well-constructed governance regime, proactive management and an instructive culture throughout your business is essential

Your people are at the heart of your business

Cybermatic provides an excellent education and training programme for your business. From the top down, your management and teams must understand and mitigate risk

Technology is key

The data you hold within your business reaches a bigger event horizon every day. Protect your business using our industry leading solution

Awareness, education, training and good governance reduce your personal risk

The foundation of your information security defences are your people. We help change the behaviour of the weakest link; an integral and valuable part of the cyber security answer.
